

A Supervillain website by Tinashé Chikowore

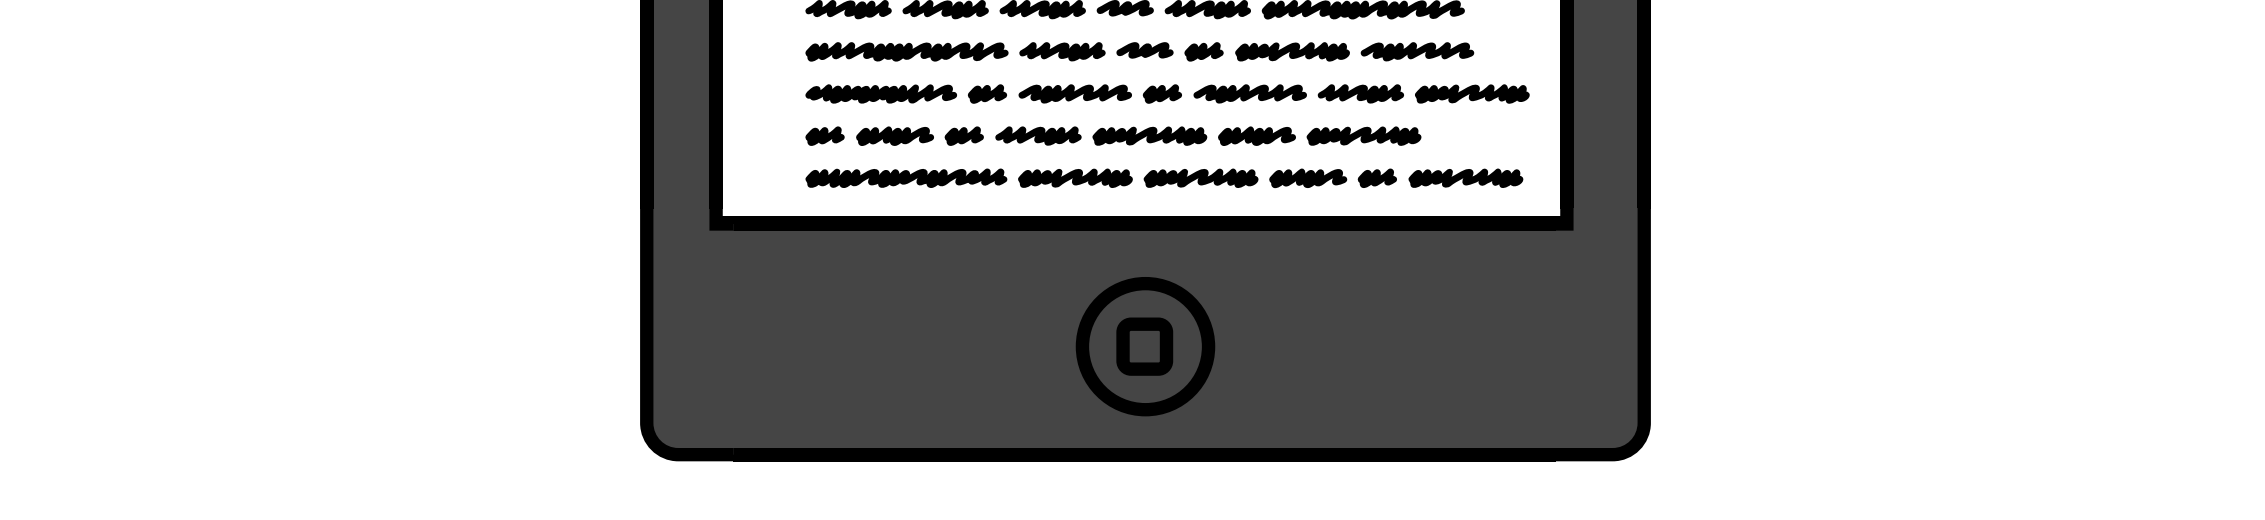

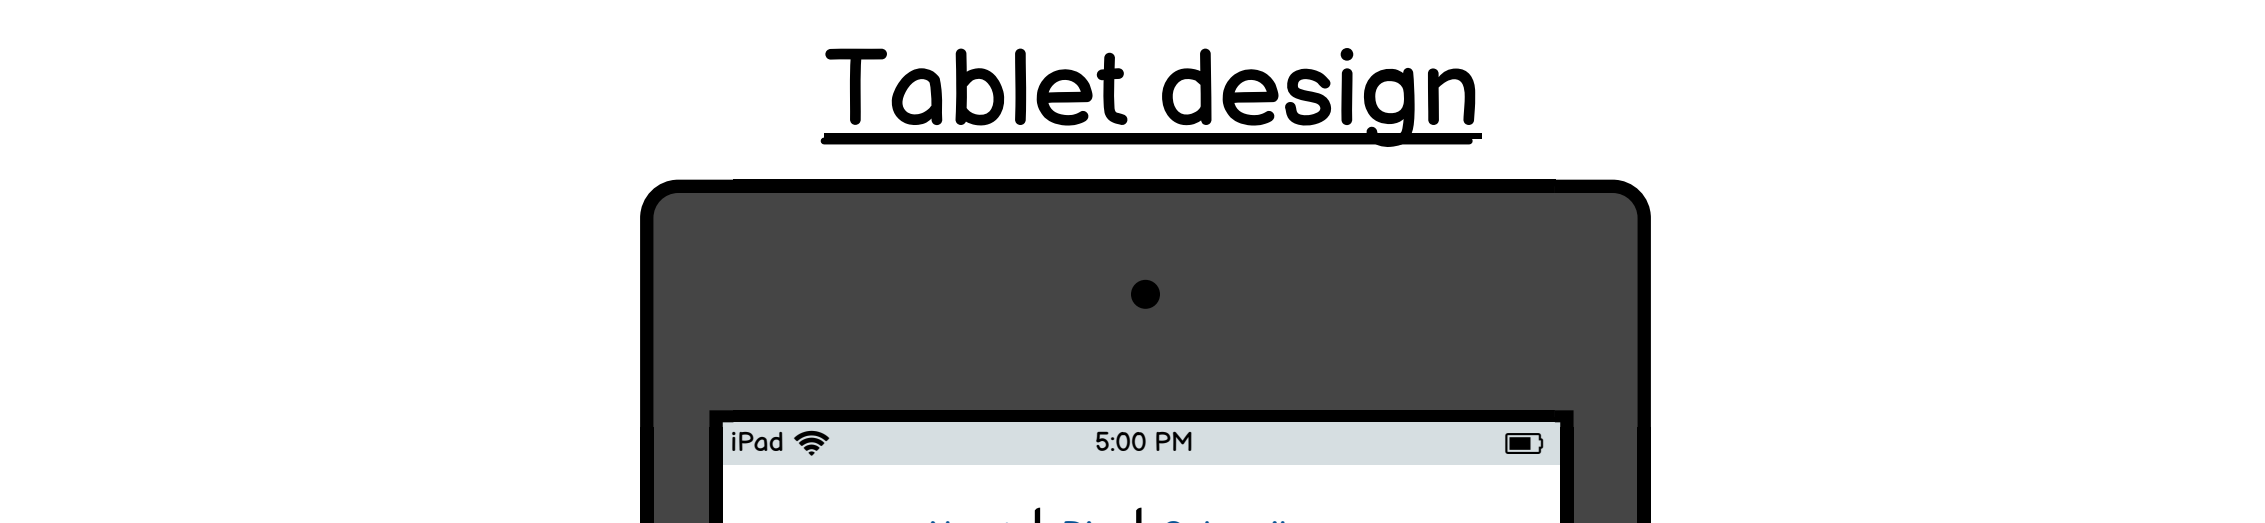

The site map for the supervillain website

Mobile design website

Tablet design

Any other details:

Mobile and tablet design will be same as the desktop however i need to be aware of the gaps and sizes of the words and pages.

I will worry about the way it looks and how it should be when i scroll down my pages on the phone. All the colours and detailed information will be in place

Conclusion

This is my first project website and hopefully creativity and simplicity will come into place because it is important to show how much i have and also i will do my best to create a simple, interesting website. My choosing of the topic made me challenge myself to see how far i have done and what i have learnt. Hopefully my website will be much villainy as possible with Reeva Payge
